Two RATHER singular cases of remarkable tecape from living burial are related as having occurred subsequent to the baule of Fair Calai. The body of a colonel was found on the field and brought in. Arrangements were made for embalaning it. The process includes the use of gaivanism. The shock was given. To use amonishment of all the colonel rose and walked forth. The other case was also that of a colonel who was found dead on the field. In Gairenne to his rank he was brought to the hospital and laid among the dead. His friends mapared to give him a decent burial, and were about to carry the body out, when the colonel rolled over, and, in tones more fike three of a man drunk than dead, called out: "Bun, John, where is my whisky flask?"

Some of the clerks in the Treasury Department, at Washington, are organizing into military companies, to be called into active service whenever the government may think the crisis such that their services will be of more value to the fleid than in carrying of the business of the department. Others are feaving to recruit companies, while their fellow clerks are raising funds for bounties to the volunteers they may secure.

The returned prisoners represent with great unanimity that the robel auditurities are by no means reis ring their efforts to complete the fortifications around Richmond, upon ten of which there are as many laborers now employed as can work upon them to advantage.

As matter of special intrinst and general information, we lay before our readers the fol-
